

Village of Mansfield
Street/Drainage Committee Meeting
November 30, 2017

Meeting called to order at 13:35 by chairman Todd Jones.

Members present: Ron Konen, Todd Jones & Zach Reynolds

Audience Members: Denna Carico & Tom Overmeyer

Road projects were discussed with Tom. He stated that he would come over after the winter and look over streets with our public works employee and come up with a plan for street maintenance for 2018.

Tom was asked if his firm was involved in the McKinley St. project at the School. He said they were and that MFT funds were used for that project. He said that he thought the school was to reimburse the Village for the Approaches to the parking lot.

Todd questioned why the MFT fund was in the negative for last year and if Tom might know what projects we did that would have caused it. He was unsure but said he could follow up with IDOT to see what projects were approved for MFT expenditures.

He was not sure what fund the parking lot South of the Village hall was paid for from. He was not aware that MFT funds was approved for it and if we did use MFT funds that we would have to reimburse the MFT fund account.

The committee discussed the "Jetter" that was mentioned at the November meeting. All felt it would be money well spent and that we should pursue it after the first of the year.

Todd has been asked about connecting private drain lines to Village tiles. The ordinance addresses some connections for Private sanitary systems. Other drain line is unclear. Committee felt that there should be a charge for all connections to Village tiles. Will add to agenda for December 4 meeting.

Committee felt that we need to update the ordinance for Parking on Jefferson Street and Oliver Street in the business district. A tentative change will be presented at the meeting December 4.

Meeting Adjourned at 14:30
